[We Succeed or Fail Together](#)

The Federal Emergency Management Agency (FEMA) and its emergency management partner organizations today released a presentation from its PrepTalks symposium series, Vance Taylor's "We Succeed or Fail Together!". Taylor is the Head of the California Governor's Office of Emergency Services, Office of Access and Functional Needs, and his PrepTalk focuses on improving outcomes for disaster survivors with access and functional needs

[VitalTag - Next-Generation Patient Monitor](#)

Every second counts during a mass casualty event. Emergency medical personnel must move quickly to triage, treat, and transport patients while keeping track of their vital signs along the way. First responders overwhelmingly indicate that a device is needed to continuously monitor patients in demanding environmental conditions. The patent-pending VitalTag sensors present a wearable, cost-effective health monitoring solution.

[Disaster Zone - Using Drones in Emergency Management](#)

In the Disaster Zone TV show Using Drones in Emergency Management you will see the different ways drones or UAVs unmanned aerial vehicles are being used in the emergency management field.

[Emerging Tech Impacting The Security Industry](#)

The DOE National Labs and Federally Funded Research and Development Centers (FFRDC's) are also very involved in developing security technologies. These include some of our nation's most recognized national Labs including: Lawrence Livermore, Oak Ridge, Argonne, Sandia, Idaho National laboratory, Battelle, and Brookhaven.

[Idaho National Laboratory \(INL\) Assists DHS Risk Assessments](#)

INL team members have unique expertise in assessing risks in critical systems and this collaboration provides the opportunity for DHS to act as a trusted third party in extremely sensitive disclosures.
